REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: As to amended claim 22 which combines the subject matter of originally filed claim 22 and claim 23, the triggering means comprising a rod which is slidable within the hollow piston rod in combination with the other limitations of the claim was not found in the prior art. As to newly filed claim 43 which combines the subject matter of originally filed claim 22 and claim 24, Applicant's arguments on page 9 of the remarks filed July 16 2007 have been deemed persuasive as to the triggering means, which is part of the piston assembly, being located within the cartridge and this in combination with the other limitations of the claim was not found in the prior art. The prior art of Jeffrey (U.S. Patent No. 5,957,897) discloses the triggering means around the outside of the cartridge. As to newly filed claim 44, which combines the subject matter of originally filed claim 22 and claim 25, the drive coupling ring with spaced apertures in combination with the other limitations of the claim was not found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
